BMI Solid Lube Bearing

Bearings for food processing industry engineered to be lubricated for life

BMI Solid Lube bearings are designed for use in application where accidental contact with water is the issue.

Solid Lube bearings are lubricated for life of the bearing and cannot be re-lubricated.

Features & Benefits

- Long Service Life.
- Extended Lubricant life
With solid lube a large amount of oil is available.
- Eliminates lubricant leakage.
- Protects against contaminants.

For any details on Solid Lube bearings feel free to contact our Sales or Engineering team on sales@bmibearings.com or design@bmibearings.com
